

Norwood Drives Electric

NORWOOD LIGHT

Commercial Level 2 Charging Rebate Program

Norwood Light currently offers a commercial Level 2 electric vehicle charging station purchase and installation rebate. The rebate amount is up to \$6,000 per dual port charging station, with up to \$3,000 for the charging unit and up to \$3,000 for the installation.

Eligible categories of Level 2 charging:

- Public Access
- MUD/Educational Campus
- Workplace/Fleet

HOW TO APPLY

1. Contact a commercial EV charging program specialist to have your project evaluated
2. Complete the application form and submit all required pre-installation documents
3. Your application will be reviewed and if your project is approved for funding, you will be issued an approval letter
4. Upon receipt of approval letter, acquire, install and make operational your project
5. Submit final required paperwork to receive your incentive payment

PROGRAM REQUIREMENTS

- Only customers having an active commercial account with Norwood Light are eligible
- Charging station must be commercial grade Level 2 240v and at least 13 amps output per port
- Funding is limited to one rebate per address
- Charging station must be networked enabled and/or have a Norwood Light submeter
- Pre-approval letter must be received before procurement and installation of project

➤ For complete program requirements and eligibility refer to the rebate application form.
